ABOUT

NITARO DIGITAL MARKETING IS AN ONLINE ADVERTISING AGENCY LOCATED IN SEOUL, SOUTH KOREA. AT NITARO DIGITAL MARKETING WE PROVIDE YOU WITH EXCELLENT MARKETING SERVICES TAILORED TO THE WANTS AND NEEDS OF YOUR BUSINESS, BECAUSE EVERY ORGANIZATION IS DIFFERENT! WE WANT TO HEAR YOUR STORY AND AMPLIFY IT, SO YOU CAN GET THE MOST OUT OF YOUR BUSINESS AND GROW IT ACCORDINGLY.

The main services we offer are Pay Per Click (PPC) advertising, Search Engine Optimization (SEO), social media (SNS), influencer and content marketing.

We at Nitaro believe that creativity should have its flow by creating ideas, conceptualizing and designing them in a way that suits our customers but also the market best.

Entering a new market requires guts and persistency. That is why at Nitaro Digital Marketing we think that being gritty opens up new opportunities, and with this in mind we help our customers grow and expand their market by applying the right marketing tools suitable for your business.

We are an international diverse team fluent in Korean, English and Dutch, serving customers from all over the world who want more Korean clients. We started in 2007 with digital marketing and our specialties are: startups, hightech, tourism and education.

#STAYGRITTY

WHAT ONLINE MARKETING WE DO

Digital marketing is expanding with the rise of technology and is part of our daily lives. More and more people are making use of digital services everyday.

So how do people become aware of your business? There are different kind of marketing practices, but we specialize in online marketing. The Korean market is very technology minded and therefore it is no surprise that digital marketing is the best way to reach out to the Korean market.

Our main services consist of PPC, SEO and social media. Besides the main services, but we also offer optional services that could help tailor your customer base if you are new to the Korean market.

Optional Services

Remarketing / Retargeting

Company Market
& Competitor Analysis

Competitor Keyword Research

Translation
(e.g. English to Korean,
Chinese, Japanese)

Automation

SERVICES

Online Marketing Service

Pay Per Click (PPC)

PPC, also known as Pay Per Click or Search Engine Advertising / Marketing (SEA / SEM) is a service that helps you attract more customers to your website through search engines / portals such as Google, Naver and Daum. These portals hold no secret for us, as we make campaigns of low cost per click (CPC) and high click through rates (CTR), with more people seeing your website!

Search Engine Optimization (SEO)

Whether it is Google, Naver or any other search engine, portal, or shopping websites, there are algorithms that decide the amount of traffic that is sent to your website. **We make sure you get the traffic you deserve, ensuring you a good ranking in Google, Naver and Daum.**

Social Media Marketing (SNS)

When it comes to social media (e.g. Facebook, Instagram, Band, KakaoTalk, or Naver Blog) **we are experts that know how to keep your audience interested and engaged with the right content.** Influencer (micro) marketing is also a tool to drive more traffic to your website/app.

SERVICES

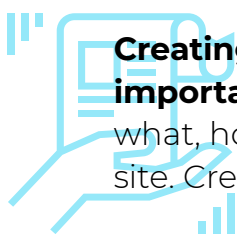

Online Marketing Service

Web Development

Having a good website is the key for a good and suitable marketing campaign. Responsive mobile sites and reliable web hosting will help you rank higher in search engines and drive more visitors to your site. **We can help develop the right landing page and get more conversions** by advising how to design your webpage, stimulating people to take action on your site

Content Marketing

Creating the right content for your audiences and timing is what we find important. People want to read about your company! We therefore advice on what, how and when to publish to attract a massive amount of people to your site. Creating content is therefore one of our guilty pleasures!

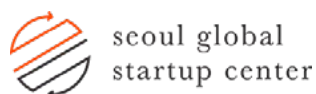

Long tail semantic keyword analysis

Keywords, the foundation for a good marketing campaign and digital marketing strategy. To ensure the right and most effective keywords are used for your service/product a long tail semantic keywords analysis is essential.

We do an in-depth analysis where we look at what keywords are most suitable, the search frequency, search behavior of the audience and if there are any content gaps, comparing them with the competitors of your business. The outcome of the analysis will not only be used for SEO, but also for Social Media posts, meta tags, blog posts, etc.

SOME OF OUR CLIENTS

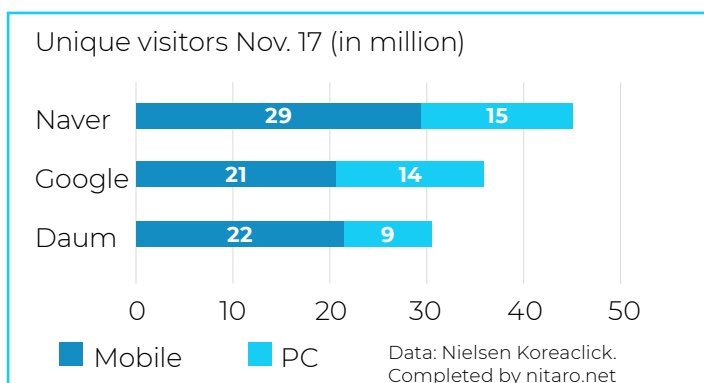

PROJECT OUTLINE: PPC

Each marketing project is different in its own way. However when it comes to PPC, all campaigns go through the same steps, whether the objective of the campaign is to generate more clicks or conversions.

Before the start of the campaign a long tail semantic keyword analysis is performed where keywords are categorized by seed keywords. After that Naver, Google, related keywords are collected and optionally competitor keywords can be identified.

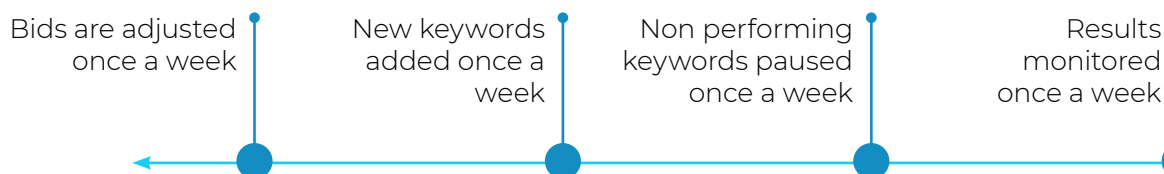

When we set up a PPC campaign we monitor the results daily in the first week and adjust things to the campaign if needed. After the first week the campaign will be monitored weekly. Besides setting up a campaign we also offer remarketing, retargeting, conversion tracking and landing page optimization.

First week

After first week

*Report (CTR, CPC, etc) will be sent monthly/weekly

PROJECT OUTLINE: SEO

SEO is not just about ranking on the first page of Google, Daum or Naver. It is about optimizing your website in a way that people (UX / UI) and search engines can easily understand the content of your website and use it for appropriate search terms, related to your service or product. Search engines crawl your website looking for the right information, and if they cannot find this your webpage might not even appear in the search results, causing your website to miss out on traffic.

Don't worry! We have the solution. We look at all aspects of your website to make sure that your website is not blocked by search engines, and that you get the traffic you deserve. We make use of SEO audit, market analysis and competitor analysis. We look for additional content gaps and make sure your website is good to go to rank high in Google, Naver / Daum! Please do know that it takes 3 to 6 months to see SEO results.

- SSL
- Local cloud hosting (AWS, Digital Ocean)
- Optional: PPC landing pages / click funnels

PROJECT OUTLINE: SNS

SNS, known as social media in western terms is quite different in Asia. Different platforms such as KakaoTalk, Naver Blog, KakaoStory, Band, etc. are actively used by Koreans. It might be hard to understand what steps to undertake when trying to reach the Korean audience on these platforms. Social media is a powerful tool to reach the Korean market. At least 84% of the Korean population makes active use of social media on their phone alone!

When creating a personalized marketing strategy we create unique content for the SNS channel of your choice. The content created will not only be customized and custom made, but also strategically designed with the right keywords and hashtags, so that views increase and your audience finds your posts, related to your topic/service/product.

TOP 10 Social Media APPs in Korea

KakaoTalk

Daum Cafe

Instagram

Band

YouTube

Naver Cafe

Facebook

KakaoStory

Snow

CASE STUDY: NAVER BLOG

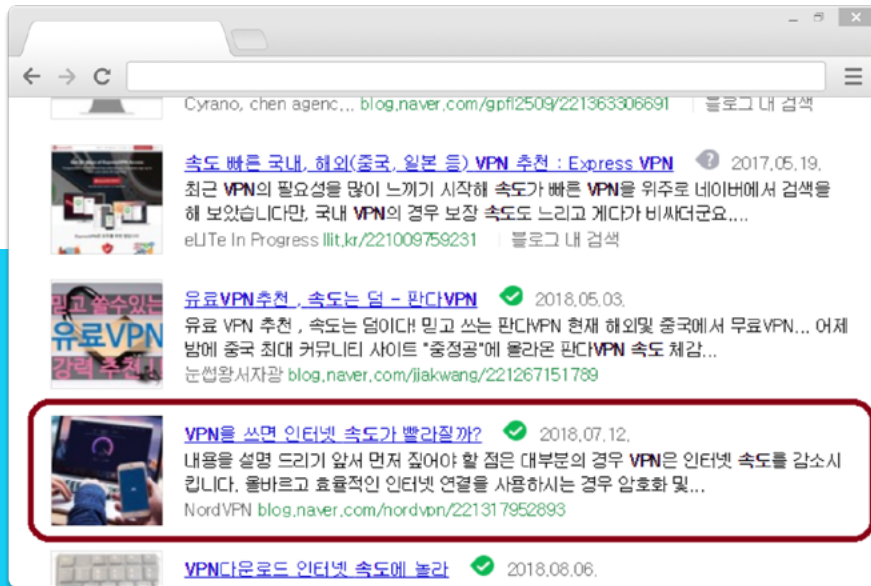

In Naver, Korea's number 1 search engine. We managed to rank second of the first page with the keyword 'iPhone VPN' on Naver blog.

We also managed to rank first page third results with the keyword 'Android VPN'

CASE STUDY: NAVER BLOG

With the keyword 'China VPN' we managed to rank first page.

For the keyword 'VPN Speed' we managed to rank first page again, but as fourth result.

CASE STUDY: ONLINE SERVICE PROVIDER IN THE USA

Attracting and obtaining new Korean customers can be hard, especially when you do not speak the language. Here an example of one of our clients, a service provider in the USA. Their request to us was to make use of our online marketing services and attracting more customers from Korea being interested in their business and becoming their client.

Why NITARO digital marketing?

Having a small budget and not being able to speak the language, Nitaro Digital Marketing was the right fit for this company. With our service offerings in English, and being able to offer a flexible strategy made our client work with us.

Challenge

- Attracting new customers, however website is not in the Korean language

Solution

- Making use of long tail semantic keywords with a strong and immediate buyer intent

Results

- 14,3% conversion rate (The average ecommerce is between 1 -5 %)
- 0,64 USD cost per click (CPC)

CASE STUDY: B2B AGENCY IN KOREA

The following company is an agency located in Korea that focuses mainly on Business 2 Business (B2B). The request of this client was if there is a possibility to create more leads to their website and thereby also increase awareness of their brand to businesses.

Nitaro Digital Marketing provided this client with the exact services that would help the agency to gain more leads.

Why NITARO digital marketing?

Because of our result oriented and problem solving nature, we came up with a perfect PPC strategy that suited the needs of the company.

Challenge

- Creating more leads but having no brand recognition

Solution

- Customized ads
- Conversion tracking
- Dynamic long tail semantic keywords

Results

- +10% CTR
- +6% Conversion rate (Google ads average is 2,35%2)
- Signed deals worth USD 40.000
